LOKT

AUDIT TRAIL LOCKER BENEFITS

BENEFITS FOR **USERS**

EFFICIENT SYSTEM

Our audit trail locker speed up the dispensing process. Whether you are tracking zebra scanners, laptops, radios or something else, the process is much quicker and requires zero human intervention. The user simply scans their card and retrieves or returns their device.

ALWAYS CHARGED UP

Most audit trail lockers also require a charging functionality as expensive devices are often electronic. Our locker systems not only charge the devices but dispense them in order of highest charged, first dispensed. This means the chances of low or no battery are avoided.

REPORT DAMAGES EASILY

Rather than having to find a manager and explain the issue directly to them, a user can approach the lockers, report the damage, describe what happened and then return their device safely. This device will then be put out of use and management will be notified.

EVIDENCE OF USE

Users benefit from audit trail lockers as they provide evidence of how often the devices are used and they cover users for any potential losses or thefts. Rather than finger pointing and blaming each other, the lockers provide more detailed insights of what happened.

BENEFITS FOR **MANAGERS**

ACCOUNTABILITY

With our audit trail lockers, managers are able to identify who used which device and at what time. This allows them to have a better understanding of who was responsible for the damage or loss in question, saving time investigating issues and resolving problems.

REDUCED DAMAGES

As users know their actions are being more closely monitored, they tend to be more careful with the devices they are using. From our experience, by just installing the locker system, businesses have seen a significant reduction in damages and losses of devices.

IMPROVED EFFICIENCY

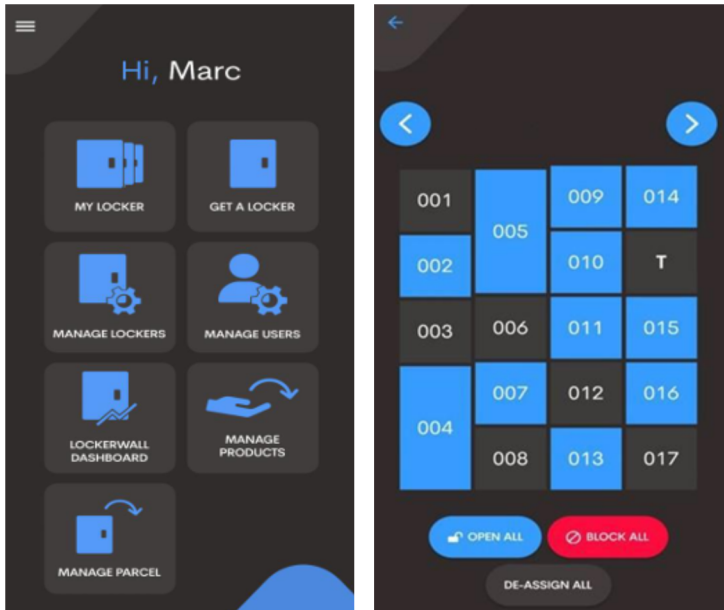

The locker system improves efficiency a huge amount. Dispensing devices, returning devices and reporting any issues is a much simpler process. Improved efficiency means more work being done and overall this is likely to increase your revenue over time.

HAPPIER WORKFORCE

Keeping your staff happy can often be a tricky tasks for managers and business owners. Confusion with expensive devices can lead to frustration, arguments and trust issues. These lockers help simplify the process improve the overall mood of the workforce.

LOKT

FLEXIBLE REPORTING & ADMINISTRATION

FLEXIBLE ADMINISTRATION

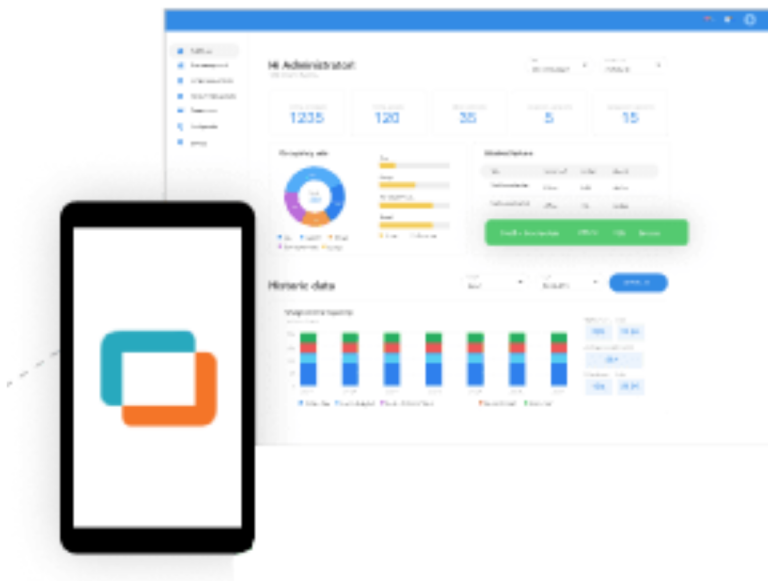

Our smart locker systems are supplied with an advanced administrative dashboard which allows you to monitor and control your systems remotely or at the kiosk.

- ✓ Users, groups and roles-based locker management
- ✓ Simple allocation of personnel lockers
- ✓ Username & password authorisations
- ✓ Secure HTTPS communications

ADVANCED REPORTING

We provide an easy-to-use, easy-to-operate and easy-to-manage reporting dashboard with 24/7 insights about the locker rental transactions and usage which can be accessed remotely.

- ✓ Interactive display of locker usage
- ✓ Usage reports with locker rental transactions
- ✓ Notifications (email / app)
- ✓ Remotely Accessible
